# DC5 WORLD

# ACTIVATION AND DEACTIVATION

Using the activation number provided (on back of Quick Start Guide or provided by online store), you will be required to activate your game purchase prior to flying a mission. During the Activation process, the copy protection system will create a hardware profile of your system and compare that to your current system each time you start the game. If there has been a significant change to your computer, like replacing significant hardware items or changing your Operating System, you may be required to reactivate your purchase.

Each game license (disk) has 10 activations and 10 deactivations. You can activate your game up to 10 times. The number of installations is unlimited!

This game also allows Activations Automatically ("AAA") technology that enables you to create a new activation once every 31 days. This ensures that you can still play the game, even if Eagle Dynamics no longer exists someday. This function is enabled after all 10 default activations have been used.

If the copy protection system detects changes to your computer hardware/software as described below, an activation will be required. It's important to note that deactivations are utilized to save your activations when altering your PC hardware/software. Before conducting a PC upgrade/OS reinstall, you can deactivate the product and when complete, reactivate without a loss of activations. Again though, you can install the game as much as you wish.

http://www.star-force.com/support/users/deactivate/

An activation will be required if the hardware/software changes exceed 12 points as rated below:

CPU ID: 13 Windows PID: 3 Computer Name: 3 Hard drive volume serial number: 3 MAC address: 6 RAM amount: 6 If you just uninstall the game and then reinstall it again on the same PC without reinstalling your operating system or changing hardware, you do not need to use a deactivation.

For further details on the copy protection system, please see the StarForce FAQ:

http://www.star-force.com/support/users/group2.php

In addition, a step-by-step (de)activation guide is available below: <u>http://www.star-force.com/support/users/group4.php#6</u>

### Automatic Activation

The Automatic Activation method is the preferred method; an Internet connection is necessary.

Install the game to your computer. Launch it and fly a mission.

The Activation window will be displayed. Please follow the directions.

Enter your Activation Number which is printed on the DVD Quick Start Guide sticker or was provided to you via e-mail/. Press the **Next** button.

The Automatic Activation is now complete.

## Manual Activation

If the automatic process fails, you may use Manual Activation via ProActive Web-site (Internet connection is necessary as well).

To activate the game via Web-site you need to get the Hardware Code. It will be entered into the ProActive Web-site.

Press the Other link in the Activation window.

Warthog 64bit - Activation	
This product requires activation. Enter your Serial Number and press "Next". Internet connection is required.	Next
	Exit
DY-Y2PYX7-YVLSBS-6NVNNX-C83N85	]
If you don't have an Internet connection, you can perform activation by <u>other</u> means.	
If you don't have a Serial Number, you can <u>buy</u> it.	
You can <u>deactivate</u> the application on this computer. See Yelp for details. Afterwards this function will be available when running the application while holding Shift or Ctrl.	
Press the <b>Other</b> link	

Your Hardware Code is then displayed in the Activation window. Copy the Serial number and Hardware Code and save them to a safe location.

Activation via ProActive Web-site is now complete. If restrictions on game usage have been implemented, the Activation window will display the details. Press Ok to launch the game.

#### Deactivation

To avoid using a product Activation, you may first Deactivate your installed game, make your changes, and then Activate again. You are provided 10 Deactivations.

You can launch the deactivation procedure by one of the two means:

The Automatic Deactivation

Deactivation via ProActive Web-site

#### The Automatic Deactivation

Run the **<aircraft name>\_protect.exe** file, which is located in associated aircraft folder into DCS World\Mods\aircraft folder. For example, the P-51D Mustang: DCS World\Mods\aircrafts\P-51D\bin\x86\_6\p51\_protect.exe

Select the **Activate or deactivate application** command as displayed in the window, then press the **Next** button.
